I developed Projects using HTML, CSS, Bootstrap, Javascript, PHP, and Mysql in order to demonstrate Frontend and Backend technologies to the candidates undergoing the training.

PROJECTS

3D Website using react open AI API Public -Link

Tech Stack: Three Js, React Three Fiber, Tailwind css, Frame motion

This is a 3D website designed using React and ThreeJs. Many large corporations already use 3D graphics to showcase their product .I Build my own ThreeJS 3D product website and infuse it with the power of artificial intelligence!

Restaurant Website -Link

Associated With Manac Infotech (P) Limited

Tech Stack:

FullStack: HTML,CSS, Bootstrap,Javascript, PHP,MySQL

The project was designed to provide users with a website that helps them navigate food-related issues, using full-stack technologies. The restaurant home page contains information on various aspects such as address, fame and opening/closing hours of the restaurant along with additional features such as table registration, feedback, menu, log in and registration. A user can log in/register and browse the menu to learn about the cuisine, reserve a table in advance and provide feedback to the restaurant

Portfolio Website -Link

Associated with Manac infotech (p) Limited

Tech Stack: HTML, CSS, Bootstrap

Personal Website

TapTap Apps -Link

Blackbuck Engineers Pvt Ltd

TechStack: Java, Firebase, Android Studio

Two apps, namely the taptap-admin app and the taptap-web view app, were designed so that it becomes easy for the admin to do various activities like sending dynamic notifications to the enrolled users and Google sign-in the user, web view, and database connectivity.

HOBBIES

Painting

Watching Entertainment

Listening to music

Chilling out with Family & Friends

Quiz App -Link

Blackbuck Engineers Pvt Ltd

TechStack: Kotlin,Android Studio

The Quiz Application is designed to provide users with an application that helps to enhance student's knowledge by conduction of quizzes with easy and efficient maintenance
